

THE BLAIRMORE ENTERPRISE

VOL. XVI, NO. 48.

THE BLAIRMORE ENTERPRISE THURSDAY, NOVEMBER 26, 1926.

DISTRICT COURT SITTING

IN BLAIRMORE THIS WEEK

A sitting of the District Court is being held in Blairmore this week, presided over by Judge A. M. McDonald, of Macleod.

Quite a number of cases are being heard, principal among which are those of Legness versus Sherring for damages and Patton and Patton versus H. H. Rogers.

BLAIRMORE ELKS' HOLD

BIRTHDAY PARTY TONIGHT

The Blairmore Elks' will celebrate their first birthday by holding a whist and social party in the Masonic Hall tonight. Whist will begin at 8 sharp. A capable committee has been appointed to look after the affair and a most enjoyable evening is assured.

CROWS' NEST PASS

FIRST AID ASSOCIATION

At a well-attended meeting of the whole district held at the Coleman central school on Sunday afternoon last, it was decided to form an organization to be known as the Crows' Nest Pass First Aid Association (Alberta). The following officers were appointed:

Honorary Presidents—John T. Sterling, Edmonton; George Kellock and O. E. S. Whiteside, Coleman; G. A. Vissac, Blairmore; W. Stevenson, Hillcrest.

President—Moses Johnson, Blairmore.

Vice-President—David Davidson, Coleman.

Secretary-Treasurer—Ed. Royle, Hillcrest.

Executive Committee—J. W. Mackin, F. J. Smith, Hillcrest; J. McAndrew, David Martin, Blairmore; H. Blake, E. C. Coostick, Bellevue; W. White, D. Davidson, R. M. Greenhalgh, J. G. Glendinning, Coleman.

It is the intention of the association to hold a competition at Coleman on May the 1st, 1927, for both senior and junior classes, open to any team of five, for which suitable prizes will be offered.

MASS MEETING OF TUXIS

BOYS AND TRAIL RANGERS

A mass meeting of Tuxis and Trail Ranger groups of the Pass towns will be held at the United church on Sunday afternoon at 3.15, to be addressed by Rev. Mr. Hibbert, secretary of religious education for the United church, and Mr. Hendry, the secretary of boys' work. Both are very interesting speakers and no doubt will be greeted by a crowded house.

A meeting of all men and boys interested in First Aid will be held in the line rescue car at Blairmore on Sunday, November 28th, at 2 p.m. First Aid classes will be started immediately, if sufficient interest is shown. Competitions in First Aid will be held in Coleman next May.

ST. ANNE'S CHURCH

BAZAAR IS HUGE SUCCESS

The annual bazaar, tea and whist drive held by the ladies of St. Anne's Catholic church at the Lodge Hall last evening and night, proved a success, despite the quietness of times.

During the afternoon a sale of fancy work, home cooking, etc., was well patronized and practically every article was disposed of. A big attraction of the evening was the fish pond for children. Tea was served from 3 to 6 p.m.

At night a whist drive was held, prizes being awarded after eighteen hands had been played. During supper the draw for the Tambola took place, the drawing being made by the longest left arm (or arm left) in Blairmore. The lucky winners were:

Piece of hand-embroidered fancy work, donated by Mrs. H. Slegdman, Macleod, won by J. Peters.

\$10.00 gold piece, donated by Mr. G. A. Vissac, won by Miss Denise Fairclough.

Hand-painted cake plate, donated by Mrs. L. L. Morgan, won by H. M. Brown, of P. Burns & Co.

Silver spoon tureen, donated by Mrs. D. M. J. Conway, won by J. Angus McDonald.

Fruit cake, donated by Mrs. F. M. Pinkney, won by J. Rodis.

\$5.00 gold piece, donated by Mr. Rabul Green, won by Mr. Alex. Mevey.

A turkey, donated by P. Burns & Co., won by Mrs. Maniquet.

Following supper, dancing was indulged in till 1 a.m.

The ladies in charge desire through The Enterprise to thank all who in any way assisted towards the splendid success of the bazaar.

BEDEVUE ARENA

ANNUAL MEETING

At the annual meeting of the Bellevue Arena, Limited, held at the Bellevue Inn last night, the reports of the secretary-treasurer and auditor were received and adopted.

The report gives the following information: The arena was opened for general skating on the 13th day of November, 1924. During the season the arena was open for general skating sixty-three nights, the earnings from this source being \$678.25, an average of \$10.77 per night. There were seven senior hockey games played and six intermediate, the receipts from these amounting to \$1,456.25.

The largest attendance for the season was on the 20th of January, when the league game between Coleman and Bellevue teams was played. A total of 1495 paid admission, representing \$994.25.

The cost of operating the arena for the season 1924-25 was \$2,001.20, plus \$275.00 for improvements and equipment, and in addition \$325.00 was granted to the senior hockey club and \$100.00 to the secretary-treasurer, making a total of \$2,676.10. Revenue was derived as follows: senior hockey games, \$1,405.75; intermediate games, \$50.50; skating, \$678.25; Curling Club, \$320.00; sundries \$26.50—total \$2,461.00. Amount owing from various sources total \$131.65.

During the season a benefit hockey game was played between Bellevue and Blairmore senior teams, when \$217.00 was realized for the W. Turner benefit fund.

Mr. S. J. Lamey acted as chairman of the meeting, while Mr. Barless filled the office of secretary.

The Bellevue Arena was erected at a total cost of \$17,211.32, and has had several successful seasons.

A. B. Stevens thinks that both love and sausage are full of mystery.

The play, "Charley's Aunt," to be put on by the Elks' Dramatic Committee, is to be staged at the opera house on Thursday, December 17th. An able cast has been chosen and are busy rehearsing.

DEATH OF MR. HUGH HUTTON

ST. LUKE'S CHURCH

ANNUAL SALE OF WORK

The death of Mr. Hugh Hutton, of Bellevue, occurred at the Colonel Belcher hospital, Calgary, on Sunday morning, following a prolonged illness. The remains were brought to Bellevue by Tuesday morning's train and will be laid to rest this afternoon in Blairmore cemetery, beside those of his wife who predeceased him several years ago.

Mr. Hutton was a veteran of the Great War and is survived by his son; father and mother, Mr. and Mrs. John Hutton, of Bellevue, and several brothers and sisters, among them Mrs. George Copeland, of Bellevue. One brother, John, resides at Cadomin, David, at Bellevue and a brother and sister in Scotland.

HIGH SCHOOL DEBATE

Owing to McGrath defaulting, the high school debate has been changed to Blairmore and will be held on Friday, December 4th, at the United church, commencing at 7.30 p.m. The subject will be: "Resolved that newspapers as at present conducted are a menace to society."

Affirmative—Misses Annie McKenale and Marietta Wheatley.

Negative—Misses Helen Miller, Rang Dawson.

MEMORIAL SERVICE

A memorial service for the late Dowager Queen Alexandra will be held at St. Luke's Anglican church this evening at 7 o'clock, to which all patriots are invited.

FATHERS-MOTHERS-SONS.

DAUGHTERS TO BANQUET

The annual get-together of the fathers, mothers, sons and daughters of the United church will take place tomorrow afternoon and night at the opera house.

It is expected that fully three hundred parents, sons and daughters will sit at the banquet tables.

Following the banquet, a programme of music, speeches, etc., will be carried out, commencing at 7.30.

The principal speakers will be Miss Hetherington, who succeeds Miss Evelyn Story as secretary of the Girls' Work Board of Alberta, and Rev. Mr. Hibbert, secretary of Religious Education for the United Church. All interested in boys' and girls' work are invited to this after programme.

H. H. Griesbach has returned to his post in the local custom house after a brief holiday spent at Edmonton. Mr. Robichaud, who was relieving Mr. Griesbach, has returned to Fernie.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphon Picture, With Wolf, the War Dog,
is an Adaptation of This Story

SYNOPSIS

With the coming of the tonic-filled days and nights of the Red Moon, a change came over Barre. Nepeese, the trapper's daughter, had made a pet of him, but Barre was half wolf and at the call of the wolves he fled to join his own, as Pierrot, the trapper, had predicted. "So," Nepeese enjoyed him. "But you must come back." Barre entered the woods and joined Mahegun, a young she-wolf, who also was seeking the pack. The ears of both were attuned for the slightest sound from the wolves.

CHAPTER XVII.—Continued.

The snow grew deeper under their feet. In the open spaces they waded through it to their knees, and it continued to fall in a vast white cloud. It was near midnight when it stopped. The clouds drifted down from under the stars and the moon, and for a long time Barre and Mahegun stood without moving, looking down from the bald crest of a ridge upon a wonderful world.

An hour after they entered the plain there came suddenly out of the west the tongue of the wolfpack. It was not far distant, probably not more than a mile along the foot of the ridge, and the sharp, quick yapping that followed the first outbreak was evidence that the long-tailed hunters had put up sudden game, a caribou or young moose, and were close at its heels. At the voice of her own people Mahegun laid her ears close to her head and was off like an arrow from a bow.

The unexpectedness of her movement and the swiftness of her flight put Barre well behind her in the race over the plain. She was running blindly, favored by luck. For an interval of perhaps five minutes the long-tailed hunters had put up sudden game, a caribou or young moose, and were close at its heels. At the voice of her own people Mahegun laid her ears close to her head and was off like an arrow from a bow.

TO EXPECTANT MOTHERS

Letter from Mrs. Ayars Tells
How Lydia E. Pinkham's
Vegetable Compound
Helped Her

Spring Valley, Sask.—"I took the Vegetable Compound before my last confinement, when I got to feeling so badly that I could not sleep nights, my back ached so across my hips, and I could hardly do any work during the day. I never had such an easy confinement and this is my sixth baby. I read about Lydia E. Pinkham's Vegetable Compound in the 'Farmer's Telegram' and wrote you for one of your books. We have no druggists in our town, but I saw your medicine in T. Eaton's catalogue, so as a farmer's wife, I got a box of it. I am feeling fine after putting in a large grain since baby came. (She is as good as she can be.) Yours, a true friend, Mrs. Ayars, Spring Valley, Sask."

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and tone up the entire system so that it may work in every respect as nature intends. The druggists sell this dependable medicine. Give it a trial.

W. N. U. 1404

but one course of night—straight ahead.

Barre had found his place in the lower rim of the horseshoe, so that he was fairly well in the rear when the climax came. The plain made a sudden dip. Straight ahead was the stream of water—water shimmering softly in the starlight, and the slight of it sent a flash great sport of blood through the caribou's burning heart. Forty seconds would tell the story—forty seconds of a last spurt for life, of a final tremendous effort to escape death. Barre felt the sudden thrill of those moments, and his forged ahead with the others in that lower rim of the horseshoe as one of the leading wolves made a lunge for the young bull's hamstring. It was a clean miss. A second wolf darted in. And this one also missed.

There was no time for others to take their place. From the broken end of the horseshoe Barre heard the caribou's heavy plunge into water. When Barre joined the pack, a mad, dashed, mouth-frothing, snarling roar, Nepeese, the young girl, was well out in the river and swimming steadily for the opposite shore.

The restless movements of the waters ceased now. A new and wondering interest held them right. Pangs closed sharply. A little in the open Barre saw Mahegun, with a big gray wolf standing near her. He went to her again, and this time she remained with flattened ears until he was sniffling her neck. And then, with a vicious snarl, she snapped at him. Her teeth sank deep in the soft flesh of his shoulder, and at the unexpectedness and pain of her attack, he let out a yelp. The next instant the big gray wolf was at him.

Agas caught unexpectedly, Barre went down with the wolf's fangs at his throat. But in him was the blood of Kazan, the flesh and bone and sinew of Kazan, and for the first time in his life he fought as Kazan fought off that terrible day on the top of the Sun Rock. That fight, if it had been fabled, would have been a victory for Barre, even in his youth and inexperience. In fairness the pack should have waited; it was a law of the pack to wait—until one was done for. But Barre was black; he was a stranger, an interloper, a creature whom they noticed now in a moment when their blood was hot with the rage and disappointment of killers who had mislaid their prey.

A second wolf sprang in, striking Barre treacherously from the flank; and while he was in the air, the first foe, the pack was on him on his back.

As an attack on the young caribou bull would have meant death in less than a minute. Every fang would have found its hold. Barre, by the fortunate circumstance that he was under his first two assailants and protected by their bodies, was saved from being torn instantly into pieces. He knew that he was fighting for his life. Over him the horde of beasts rolled and twisted and snarled; he felt the burning pain of teeth sinking into his flesh; he was smothered; a hundred knives seemed cutting him into pieces; yet no sound—not a whimper or a cry—came from him now in the horror and hopelessness of it all.

It would have ended in another half-minute had the struggle not been at the very edge of the bank. Undermined by the erosion of the spring floods, a section of this bank suddenly gave way, and with it went Barre and half the pack. In the fall, Barre thought of water and the escaping caribou. For a bare instant the cave in had set him free of the pack, and in that space he gave a single leap over the deep water of the stream. Close behind him half a dozen jaws snapped shut on empty air. As it saved the caribou, so this strip of water shimmering in the glow of the moon and stars had saved Barre. The stream was not deep, but it cost Barre close to a losing struggle to get across it. Until he dragged himself out on the opposite shore, the extent of his injuries was not impressed upon him fully. One hind leg, for the time was useless; his forward left shoulder was laid open to the bone; his head and body were torn and cut; and as he dragged himself slowly away from the stream, the trail he left in the snow

was a red path of blood. It trickled from his panting jaws, between which his tongue was bleeding; it ran down his legs, hands and belly, and it dripped from his ears, one of which was slit clean for two inches as though cut with a knife. His instincts were dazed, his perception of things clouded as if by a veil drawn close over his eyes.

(To be continued)

Wonders Of Malay Jungle

Is Described As a Topsy-Turvy Land
By a British Investigator

An extraordinary account of the Malay jungle was given in a lecture delivered by Carvel Wells, who has just returned to London after surveying the British railroad which runs through the jungle. Darwin, who visited the jungle, called it a topsy-turvy land, but this is the first time a full account of it has reached London.

"Nature seems to have been completely upset by the absence in the jungle of any marked seasons," said Mr. Wells. "You will find birds nesting in one tree and the same kind of birds moulting in another. You may have a tree in your garden with fruit while your neighbor has the same tree blossoming."

"The jungle is still the home of tigers, panthers, elephants, rhinoceroses and snakes thirty feet long. There are butterflies more than a foot wide."

"The Malay bird, a small parrot, called a serikat, sleeps upside down. Another bird, the bastard quail, is peculiar because the female is larger than the male. She lays the eggs and he sits on them, and during the mating season she fights for him."

"The most singular animal in a native fish which seldom is seen in the water. I saw one come out of a hole in the ground, hop, skip, jump and swim to a tree and climb up it. The fish seem to feed the host because one can see them walk down trees to pools, where they take bath. This fish is named by scientists peripatimus, or funny fish."

"Crabs eat coconuts, fish eat coral, and rats live in tops of tall trees. There seems to be a bigger and a smaller everything. There's the biggest insect in the world, thirteen inches long, and the smallest man, which weighs less than an ounce."

Mr. Wells showed slides of all the animals and conditions he described. He also demonstrated how the natives make fire by compressing air at such a degree of heat in a little bone cylinder that a spark is produced.

Queer Farms In California

Freak Establishments Where Alligators, Ostriches and Butterflies Are Raised

In the language of Southern California, "farm" is the word commonly used to describe a freak establishment, like the alligator nursery. It is a place where one raises oranges or lemons, it is a grove. Cattle, hogs, beans, beets or kindred products come from a ranch.

Freak farms are on the increase and the increase is not altogether welcome. The chamber of commerce of Los Angeles issued a friendly warning to new settlers that there really is no room for more fur-bearing rabbit farms and that "the individual investor who enters the rabbit breeding industry for the purpose of selling furs will find himself disappointed."

So far, however, the alligator farm sphere does not seem to be overcrowded, and there are at least two prospectors of ostrich farms, a gold farm, a lion farm, two butterfly farms, a frog farm, several silver fox farms and a number of pigeon farms.

New Type Engine For Logging Camps
The engine has been brought into use in the logging camps of the Pacific coast next year, if recommendations before the Pacific logging congress, held recently at Seattle, are adopted. The increasing remoteness of the timber regions and the prohibitive cost of wood and gasoline make it necessary, it is said, to find some other form of power.

A bachelor says that marriage may be a cure for loneliness, and that the remedy is worse than the disease.

Prevent Grippe with Minard's Liniment

And Now Synthetic Rubber

German Scientists Claim to Produce Synthetic Rubber from Potatoes
German scientists have succeeded in producing synthetic rubber from potatoes. The synthetic product is said to compare favorably in elasticity with the distilled sap of rubber trees. According to Chemiker Zeitung, the discovery was accidental. Various chemists, endeavoring to establish the chemical composition of India rubber, isolated isopren, the most important ingredient of rubber. Isopren, it was found, is contained in potatoes.

The chemists abandoned their original research and, concentrating on potatoes, developed a method of combining the potato isopren with other chemicals to produce synthetic rubber.

PURE RICH BLOOD MEANS GOOD HEALTH

Also It Means Bright Eyes, Red Lips and Rosy Cheeks

The lack of sufficient red, health-giving blood does not end merely in pale faces and listless eyes. It is much more serious. Bloodless people are the tired, languid, run-down folk who have no enjoyment in life. They have heart palpitation, headaches and backaches, no appetite, sometimes fainting spells, and always nervousness. Just a little more rich, red blood and these troubles vanish. "No rest this year," said Dr. Williams' Pink Pills are just the thing you need. That is why these pills have a world-wide reputation with a blood and nerve tonic. Among those who have proved the truth of these statements are Miss Annie M. Blomfield, Woodbridge, Man., who says: "It became very weak and nervous, had pains in my head and back and suffered from frequent sick headaches. It was hardly able to do anything about the house and would awake with a start at night, with my heart pounding violently. I walked upstairs and my head would spin. My heart would flutter rapidly. I used doctor's medicine but it did not do me any permanent good. Then I was advised to take Dr. Williams' Pink Pills and decided to try them, and I can only say that they have done wonders for me. I am now well and strong again and able to do all my work, and this is all due to Dr. Williams' Pink Pills. I have recommended the pills to others who have taken them with equally good results."

You can get the pills from your druggist, or by mail at 60 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Put Away For The Night
Robert was making his first trip to a Pullman sleeper and had been put in the upper berth. During the night he awakened and began to cry.

"Don't you know where you are dear?" his mother asked.

"Course I do," was the reply. "I'm in the top drawer."—Chicago Daily News.

Your Asthma, Too. The efficacy of Dr. J. D. Kollig's Asthma Remedy is not something that is merely to be hoped for. It is to be expected. It seldom fails to bring relief, and in your own individual case it will do the same. 50 universal has been the success of this far-famed remedy that every one afflicted with this disease owes it to himself to try it.

Blood transfusions are given by 150 University of Michigan students to help pay their way through college. They are called from classroom, theatre or sleep as the emergency requires.

Always provide for the worst—the best can provide for itself.

Long Range Weather Forecasts

Dr. Abbot's Researches May Foretell
1 Year's Ahead

Long range weather forecasting and its possibilities are to be explored thoroughly. Dr. Charles G. Abbot, director of the Smithsonian Institution's Astrophysical Observatory, Washington, has gone to Morocco, South Africa and Baluchistan via England, in the campaign to foretell the weather—not days—but weeks, months and even years ahead.

Dr. Abbot heads the Solar Radiation Expedition of the National Geographical Society in co-operation with the Smithsonian Institution. The expedition will select a site for establishment of a station to measure daily variations in the heat of the sun. It is by the study of the sun that science hopes to revolutionize weather forecasting. At present weather bureaus base their forecasts on temperature and air pressures. At best they do not look ahead more than a few days.

Publicity For Canada

How Dominion Has Benefited
Through British Empire
Exhibition

According to a report from London it is estimated that 28,000,000 persons, the equivalent of two out of every three men, women and children in Great Britain, visited the British Empire Exhibition, and of these 95 per cent went through the Canadian Buildings. It is stated that there has been over a thousand inquiries a week through the Canadian Inquiry Stand, regarding emigration, with an unusual number of inquiries regarding investment in mining, hydro-electric and other industries. Exporters of Canadian products have undoubtedly reaped a harvest of orders.

U. S. and Agitators

Will Court Propaganda Which Has Become Dangerous to the State.

A growing impudence is manifest in the United States with the malignant element of the population, mostly of foreign birth or descent, who take every opportunity of maligning the state and its institutions while enjoying privileges unknown in the countries of their origin. A series of recent events indicate that the long-suffering authorities are nearing the limits of toleration for the disgruntled agitators who presume to dictate the governmental policy should be upon matters vitally affecting the welfare of the nation and the preservation of the American spirit. The attempts of New York groups of irreconcilables to annoy and insult distinguished citizens or visitors have been receiving adequate police attention of late weeks, while the raids made by Scotland Yard upon Communist headquarters indicate an intention to curb propaganda which has become daring to the degree of danger.—Montreal Gazette.

Diet and Disease

Instilling the Fundamental Principles of Food Chemistry in the Public.

Sir William Arbuthnot Lane, of London, tells the American College of Surgeons at Philadelphia that 95 per cent. of all human beings are eating themselves into an early grave.

Says he: "It is not an exaggeration to say that we suffer and die through the ill which arise in our alimentary system."

With this opinion Dr. Charles Mayo and most of America's greatest surgeons agree.

Food chemistry has become the greatest single factor in the prevention and cure of disease.

And within the next five years, the first and foremost task of the medical profession will be to instill the fundamental principles of food chemistry into the public mind.

Once the world is taught how to eat, hospitals and operating theatres will go out of business.—Vancouver Sun.

Reduce Butter Output in England

English Farmer Can Make More Money Selling Milk

England's picturesque dairy-farmers, whose pink cheeks and fair complexions have for generations been a source of pride and admiration and the inspiration for countless artists and poets, may soon be a legend. And all because the English farmer has found they can make more money by selling their milk than they can by making butter.

It takes two and a half gallons of milk to make a pound of butter, while the farmer can get about two shillings, and two pence. Even in summer he can sell his milk at the prices for a shilling a gallon, so that there is much more to be made by the latter transaction. As a consequence farmers are discarding their butter-making apparatus and are buying butter in many cases for their own use.

The importation of butter into Great Britain is increasing.

Believe Alaska Was Once Tropical Country

Investigations Next Summer

Buried tree trunks found in Alaska have set scientists wondering whether Alaska was once a tropical or semi-tropical country. Prospectors who recently returned from the interior brought with them samples of sand and bark of ancient trees which they had found at the bottom of a shaft they had sunk in quest of gold. The men ascended the Kobuk River and traveled forty miles south. Here in numerous holes they found deep sand in layers similar to the drift of great forests, buried trunks of trees with rough bark as of fruit trees and long wide blades of grass like bamboo, sorghum or papaya. The site of the vegetation indicates a former tropical climate. Further investigation is planned for early summer in 1926.

Fur Coats Popular

Canada is taking on the fur coat in preference to the fur-lined variety, according to the bureau of statistics, the manufacture of fur coats, both women's and men's, is increasing, while that of fur-lined coats is declining. Last year, there were 60,000 women's fur coats in Canada, but only 800 women's fur-lined coats.

It all were qualified to do something useful, where would the world go for critics?

When a woman decides that clear shoes aren't good for the carpet, the honeymoon is over.

A bee dies when it stings you. Now if it could be crossed with the man who sells stock.

1207

Smartly Simple

A triumph of class and cleanliness in navy uniform. It is most essential that every smart wardrobe should contain at least one frock of this type. In every detail it illustrates the theory that the long line is the shortest route to slenderness. Two inverted plaits extend full length on either side of the front. A straight piece of the material is folded to form a trimming-band two inches wide and placed beneath the edge of the outside plait before it is stitched. Flat bone buttons trim the band. The back is plain and extends over the shoulder, fastening onto the front in yoke effect. The yoked neck opening is very becoming, and is finished with a tailor's collar. The sleeves possess the simple design of No. 1207, which is in sizes 34, 36, 38, 40 and 42 inches bust. Size 38 requires 4 yards of 36-inch or 34-inch of 46-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Motor Car Runs On Storage Battery

A radio report from Moscow says that a man named Joffe, a doctor of science, has invented a storage battery that can run a motor car for 10 days and nights at highest speed without recharging. The report says that the battery is so small that it can be carried in a person's pocket.

It is estimated that less than 3 per cent. of successful men remember anything about algebra.

ECZEMA OVER FACE AND BODY

Nearly Driven Crazy By Itching, Cuticura Healed.

"I was bothered for a year with eczema all over my face and body. It was so pimply and I kept it irritated by scratching for it nearly drove me crazy, and it kept me awake nights."

"I was treated but it did not help me when I heard about Cuticura Soap and Ointment. I bought them. I used two cakes of Cuticura Soap and one box of Cuticura Ointment, and I was healed." (Signed) Alton Brooks, Charlotte, Vermont, Sept. 16, 1924.

Clear the pores of impurities by daily use of Cuticura Soap with water. Use of Cuticura Ointment is needed to soothe and heal. Cuticura is made in fragments and refreshing. An ideal toilet powder.

Send for Free Book by Mail. Address: Cuticura, Dept. 100, P.O. Box 100, Lowell, Mass. U.S.A.

The pressure of outflowing sap in injured trees in the spring may reach as high as 150 pounds to the square inch, or equal to the steam pressure in an ordinary locomotive.

C.P.R. Weston Shops

Building Covers 160 Acres and Property Represents Investment of \$800,000.

The Young Men's Section of the Winnipeg Board of Trade were the guests of the Canadian Pacific Railway at an informal luncheon recently, at which an opportunity was given them in attendance to see through the Weston shops.

The construction of these shops was commenced in August, 1923, and completed July, 1925, representing an investment of \$800,000. The property appropriated for shop purposes was 320 acres, and 160 acres are actually at the present time being used for shop purposes. The plant consists of 13 different shop buildings and one central store or supply building. There is 35 miles of service roads, industrial tracks and paved roadways used in conjunction with transportation of material and supplies. The machinery equipment consists of 1,179 machines, 463 electric motors representing a total horsepower of 6,300, boiler power plant generating 2,500 h.p. consuming daily 250,000 gallons of water. There are 32 miles of water, steam and air and air pipes used in connection with the utilities, and the average number of men employed is 15,000. The coal consumed each day during winter months averages 75 tons. The monthly payroll amounts to \$100,000.

The principal buildings consist of a general store building carrying a stock of material representing \$1,225,000, with an annual turnover of \$5,000,000. The iron foundry, with a capacity of 400 tons at present turning out 100 tons per month, in conjunction with the foundry there is a modern pattern shop in which all patterns are manufactured and stored, holding patterns to the value of \$75,000.

The locomotive shop has a capacity in output of locomotives per month, and in addition contributes to the finishing of manufactured material to the amount of \$15,000 each month.

The blacksmith and forge shop is kept up-to-date in the matter of machinery man production, and is fully equipped with dies and dies. The tool shop from a small beginning as a repair shop only, has developed to such proportions that all new and repaired, required for use on western lines, are now handled in this plant.

The east and west coach shops, with a capacity of 50 general repairs per month, are worked at their peak during the months of November and December, giving employment to a large number of tradesmen. The wood mill is modern in every respect and in addition to taking care of the requirements for the loco shop, manufactures material and other equipment required for cars and locomotives, taking care of the territory as far west as Moose Jaw.

The boiler shop is the largest of its kind in the Dominion, devoted exclusively to the repair of boilers and freight cars, and steel car shops are capable of rebuilding and putting into the shops of the Dominion.

The shops are equipped with the latest tools and machinery, and are capable of handling any work that may be required. The shops are equipped with the latest tools and machinery, and are capable of handling any work that may be required.

Gives Good Advice

Sir Robert Horne Returns From Canada Urging Britons to Emigrate

"I have just come back from Canada," declared Sir Robert Horne, speaking in Scotland, "and I imagine that any man here would rather have a precarious existence, dependent upon charity, than go to the great Dominion and gain a new existence for himself by the sweat of his brow."

The foregoing sentiments were broadcast over Great Britain by Sir Robert Horne, was now free of government office he might devote his administration and organizing ability to overseeing a scheme under which desirable people could emigrate to Canada with good chances of success.

Winter Sports In Rockies

"Norman" to Make Pack Horse Trips to Yoho Valley

An organization to be known as the "Normans" has been organized by the Marquis M. N. Desjardins, winter sports director at Lake Placid. It is intended to organize fifteen and thirty day pack horse trips through the Canadian Rockies into the Far North. The northern limit of the trail will be the Columbia Ice fields. The western limit will be the Yoho Valley and as far south as Mount Assiniboine.

British Farm Boys

Approximately Four Hundred Registered Training in Alberta

Three contingents of British farm boys are coming from various agricultural districts of England to Alberta for further training. Two parties of twenty are already at the schools of Forestry and Oils, and another of twenty is en route to the schools of Carthage. With the addition of the newcomers, the registration of British farm boys in Alberta will number approximately four hundred.

No matter how deep-rooted the corn may be, it must yield to Hottel's Corn Remover if used as directed.

Doctor: "I suppose, Mrs. Johnson, that you have given the medicine according to directions."

Mrs. Johnson: "Well, doctah, I done ma best." You said give Bain one of those head and toes, and a day ontill gone, but I done run out of pills yesterday an' he ain't gone yet."

Tommy: "Did you ever see an auto without a top?"

His Father: "Yes, I saw a car hit another car and then into a ditch and turn turtle. Now don't ask any more questions."

Tommy: "But what did they do with the turtle?"

Many Crossing Mishaps

Railway Will Soon Have to Take Steps To Protect Property

Not the least of expenses in connection with operation of railway systems is the damage continually done at level crossings by motorists who refuse to obey signals, or who give the meek excuse that their brakes failed to work. That the railways are approached with a vengeance they will have to protect protection from flank attacks from automobile drivers running through crossing gates and into the side of moving trains, is the belief of J. P. Pratt, assistant counsel for the Central Railway, Canadian National Railways.

Manufacturing In B.C.

Growth of Manufacturing in the Province Has Been Phenomenal

British Columbia's growth as a manufacturing province is well illustrated by figures compiled by the Provincial Government. In 1880 only 415 plants were in operation, producing about \$3,000,000 worth of goods per year, whereas in 1924 no less than 3,566 firms were in operation, with a total payroll of \$167,000,000, and produced goods to the gross value of \$285,000,000 the capital investment amounted to over \$300,000,000.

Anticipate Good Season For Trappers

According to advice from Fort Simpson, nearly 1,000 miles north of Edmonton, the indications are a good year. Lynx and fox are numerous, while marten and beaver are well up to the average.

INCOME TAX REDUCTIONS

The United States congress has started work on the promised reduction in the income taxes. This is especially interesting to Canada—not only because we live alongside the United States and cannot afford to have our taxes conspicuously higher than those of the land which attracts the "exodus"—but also because several of our ministers promised during the campaign to reduce our income taxes after the elections.

Hence Canadians are interested in knowing what is going on. The U.S. income tax rates are already lower than ours, but the House Ways and Means Committee proposes to make them still lower.

For instance, the exemptions from all taxation may be increased to \$1,500 for single persons and to \$3,500 for heads of families. Our exemptions only reach \$1,000 for single persons and \$2,000 for heads of families. This will be a great lure for heads of families earning between \$2,000 and \$3,500.

The exemption for children is now \$400 in the United States, and the age limit may be raised to twenty-one.

Our normal rate on the first \$4,000 of taxable income is 1 per cent. The U.S. rate is now only 2 per cent and it is proposed to reduce it to 1 1/4 per cent. Our normal rate above the first four thousand of taxable income is 8 per cent.

The U.S. rate is now only 2 per cent on the second \$4,000, and it is proposed to reduce even this to 3 per cent. Above that limit, the rate in the States is now 6 per cent and the plan is to reduce it to 5 per cent, as against our steady rate of 8 per cent.

This is a condition of things that cannot be allowed to last. The comparison is too heavy against us. Our ministers promised to give us a reduction. They should be kept to their promise—*Fugate Herald* and *Weekly Star*.

STYLES HAVE CHANGED

According to the latest approved styles, little boys wear long pants and big boys wear short ones. We note youngsters apparently not over four years old in long trousers just like their fathers used to wear, and we see large fat men of fifty being young again in knickers. But one is not surprised to see anything these days. We saw a lady fishing last summer. She wore blue overalls and suspenders. We could forgive the overalls but not the suspenders. We think she should have taken a sporting chance and left off the suspenders. A famous judge asks all men to grow a moustache as the last semblance to masculinity.

Pat and Mike went for a walk. Pat, who was the shorter of the two, could not keep up with Mike's long strides, and after a while began to get very tired and out of breath.

"Sure, Mike," he exclaimed, "do ye always walk as fast as this?"

"Yes," replied Mike, "and faster than this when I'm by myself." "Indeed!" exclaimed Pat. "Sure, and I wouldn't like to be walking with ye when ye're by yourself, Mike."

There is one word in the English language that contains all the vowels. It is "unquestionably."

Irritable husband (to wife driving a nail): "However do you expect to knock a nail in the wall with a clothes brush? For goodness sake, use your head, dear!"

Here and There

Basting in brilliant autumn sun-shine, the coast of British Columbia offers a striking contrast to the severe winter weather already making itself felt in other parts of Canada. On the coast, golf courses are crowded, the ocean is dotted with figures of bathers taking their daily dip, and pleasure craft fill the waters.

One hundred thousand dollars' worth of Black Fox supplies were shipped to Astoria on the Canadian Pacific liner "Moltre" recently. In specially built cages they will be conveyed by the Dominion Express across Europe to the farm in Switzerland where they will form the nucleus of a fox-breeding establishment.

Another instance of heedlessness. A recent report from Hull is to the effect that an automobile, travelling at high speed, crashed through both at the Chelsea Road level crossing just as they were being lowered to stop traffic so that a light engine should pass. The automobile smashed its way over the tracks barely two feet ahead of the locomotive.

Arthur Edward Shave, in the employ of the Canadian Pacific Railway since August 18, 1908, when he was appointed clerk in the office of the Treasurer, has been appointed assistant treasurer of the company. Mr. Shave became assistant chief clerk in the office of the Treasurer in 1915 and was promoted Chief Clerk in 1919.

The apple is a typical Canadian fruit and among the finest grown in the Dominion. It is incomparable as a Christmas gift for friends and relatives in Great Britain. In order to facilitate shipments, the Dominion Express Company are offering special rates. Standard boxes containing about 100 and standard barrels holding about 275 will be sent from Quebec or Montreal up to the close of navigation to any station on a railroad in Great Britain or Ireland at a cost of \$2 and \$6, respectively.

To perpetuate the memory of the late P. E. Alexander, Peterson where engineers in this part of the country gather in the presence of the engineer, done in oils by the late Robert Harris, Canadian artist, is to be hung in the Engineering Institute on McMillan street. The late Mr. Peterson, former engineer of the Canadian Pacific Railway, took a leading part in the railway construction in Eastern Canada during the latter part of the last century.

According to a report just issued from Canadian Pacific Railway headquarters, an average of one instance of gross carelessness on the part of automobilists every seventeen days in the record during the last three years and two months in connection with level crossings in New Brunswick, Quebec, Ontario and the Algoma districts. These instances number 69 from September 1, 1925, to October 31 last, or a period of 1,127 days. They resulted in injuries to 53 persons, of whom two died.

Creation of a new industry in Western Canada covering a product which is now imported into this country to the value of about five million dollars annually is foreshadowed by the samples of hemp now on display at the Windsor Station, Montreal, according to G. G. Ombunney, Development Engineer, Canadian Pacific Railway. Mr. Ombunney stated that considerable work had already been done in the West of Canada towards the creation of such an industry. Efforts to promote commerce have been made in recent months and there is no doubt that fine stands of hemp can easily be grown in certain districts.

The institution of the new Elks Lodge at Clareholm will take place on Wednesday, December the 9th.

Cracklings
The hours I spent with thee, dear heart,
Are fraught with joy and bliss, al-
though

At times I'd like to kick apart
My Radio, my Radio.
But still I tune and tune in vain—
I listen in unto the end, and there
You screech again.

"B" batteries and amphetamine.
O tuning coil that makes me cross,
I wish that I could cure your plastic
groan.

But you're a loss, sweetheart, a
Total loss.

ERRORS IN OLD BIBLES

Some very quaint errors appear in old versions of the Bible. The *Fig Bible*, published in 1951 makes the Psalmist say "Thou shalt not be afraid of any bug (terror) by night." Bug is the old English form of the word bogey. The *Beer Bible* says: "Thou shalt not drink beer with a song." As wine was little used in England at the time, the translator was trying to imply a word that all his readers might understand. More curious is the *Treacle Bible*, in which Jeremiah's question, "Is there no balm in Gilead?" becomes "Is there no treacle in Gilead?" The *Vinegar Bible* obtains its name from printing in the heading of St. Luke, Chap. xx, "The parable of the Vinegar," instead of "the vineyard." The best known of all curious Bibles is the *Breeches Bible*, in which the description of the disfigurement of Adam and Eve, reads: "And they sewed fig leaves together and made themselves breeches."

ANKLE AGONY

A sad, and story comes over the cable from London. Dainty shoes, gossamer stockings, and abbreviated skirts have combined to create a new ailment which has been named "ankle agony," because it takes the form of swollen, inflamed and painful ankles. The future is full of gloom. For, according to the celebrated specialists who congregate in Harley Street, there is but one effective antidote. That is the triple and simultaneous application of thick-soled shoes, woolen stockings and longer skirts.

The mere thought of such a procedure is sufficient to bring about a violent reaction on the part of those who contemplate the cure.

Let us relieve the fair sex of ankle agony, by all means, but surely medical science has learned enough by now to avoid such gauche and impetuous suggestions as the abandonment of those weapons whereby lovely women holds more than her submissive slave!—*Montreal Star*.

"UNIVERSITY IN OVERALLS" CALENDAR

The first calendar, just issued, of the Frontier College, Canada's "university in overalls," tells the manual workers, no matter how far out on the frontier, how they may obtain a university degree and what help is available. For twenty-five years the Frontier College has been taking secondary education to our outer lines of settlement. It is now prepared, under Dominion charter, to confer degrees in arts upon those who have the pluck and determination to complete courses.

Inspired by the principle that the worker has a right to education beyond that given in the primary school, the Frontier College has sent its instructors to the mines, the forests, the fisheries, the outlying settlements and the factories, and has carried on educational work in remote places. University men and students in research departments engage in the same hard manual labor as their fellows by day and achieve success in teaching after working hours. Each year has seen an increasing enrollment of students and instructors, proving that success will follow effort in every opportunity to the workers when fact and courage are combined with instruction. A little support from a provincial government here, or from a railroad there, an occasional gift by a corporation or individual to the Frontier College has built up its courses and its reputation with only the pith of education to stimulate it and no glamour to smooth the steps to Paradise.

To the man, anywhere in Canada, who works with a craving for knowledge, this calendar, which may be obtained from the College at 67 Yonge Street, Toronto 2, Ontario, brings hope of achieving education with friendly and practicable assistance and, under special conditions, with some financial help in fellowships or prizes. To the ordinary man who takes some interest in practical philanthropic work the calendar is inspiring reading.

IT PAYS

Here's some straight talk from Fred W. Anderson, of Cozard, Nebraska, a successful merchant:

"I have no sympathy for the merchant who sleeps between advertised blankets, on bed springs that are nationally advertised, sleeps in advertised pyjamas, who puts on advertised underwear, shirts, garters, shoes and clothing when he gets up in the morning, who eats advertised cereals and foods for breakfast, who rides to work in an advertised car, and who, when he gets to work refuses to advertise. He ought to go broke—and he probably will. If I were to start in business again today I would invest five per cent of my gross sales in advertising. It pays."

After writing a prescription for a patient, the doctor told him the drug it would probably charge a dollar for making up the medicine. When the patient asked the doctor to lend him the money, the doctor took the prescription and carefully scratched out a part of it, handing it back with the words: "You can have that made up for a quarter. What I scratched out was more medicine."

-:- Southern Alberta's Best Weekly Paper -:-

As a Crowning Triumph to the many improvements recently made to this popular home journal, The Enterprise offers a wonderful new

INSURANCE POLICY FREE!

No other weekly newspaper in Canada has ever offered its readers such a magnificent and generous gift. The benefits offered by The Enterprise have been carefully and skilfully planned, so that they will at once make a universal appeal.

The Breadwinners coming home from their work—Husbands and Wives who encounter the daily perils of the street and travel—the Children who in every-day life run many and frequent risks—all have received consideration in framing this, the first and only Insurance Policy ever offered by a weekly newspaper in Canada.

Read the list of benefits below and avail yourself of this wonderful protection by becoming a member of The Blairmore Enterprise Insurance Club AT ONCE—tomorrow may be too late.

\$1000.00 Accident Policy

THE POLICY COVERS YOU

While riding in or driving your own, or any one else's automobile.
While riding in or driving your own, or any one else's horse-drawn vehicle.
While in any public conveyance of any description, such as a train, taxi, steamship, subway, bus, trolley, elevator, etc.
While bathing.
Through the collapse or burning of a building.
Through the collapse or explosion of a boiler.
Through a tornado, cyclone or earthquake.
By being struck by lightning.

AND PAYS YOU

\$1,000.00 for loss of life, limbs or sight.
500.00 for loss of either hand or foot.
250.00 for loss of thumb or forefinger.
125.00 for loss of one or more fingers or toes.
50.00 for loss of either eye.

And many other payments for various injuries.

\$100.00 REGISTRATION BENEFIT

Should the insured be injured away from his home or friends, the Company will pay the expenses of putting him or her in care of, or in communication with friends, up to \$100.00.

AGE LIMITS 16 TO 65

MAN OR WOMAN

NO MEDICAL EXAMINATION—NO RED TAPE

This Policy means SATISFACTION to you
It has been written for YOUR Benefit

What you have to do

Simply subscribe to The Blairmore Enterprise for One Year at the regular price of \$2.00 a year, or Six Months for \$1.00, and pay the Club Registration fee of \$1.00, and a regular numbered policy will immediately be mailed to you.

\$50,000,000.00 Security for Policy Holders

The policy holders are insured in the General Accident Assurance Company of Canada. There is over \$50,000,000.00 as security for policy holders behind the policies.

Mail This Coupon Now

Remit by Dominion Express Money Order, or Postal Note.

RADIO EDUCATION POINTERS

OTTAWA, Nov. 21.—Education of fans in the proper operation of regenerative receivers has been undertaken by the radio branch of the department of marine and fisheries of Canada.

It is an attempt to reduce the amount of interference to radio reception caused by squealing sets.

To get the best results from such receivers and still keep from interfering with other fans' enjoyment, fans are asked to follow these rules:

1. Practice on tuning powerful stations first and do not try to pick up weak distant stations until you become expert.
2. Use both hands, one hand for the regeneration control and the other hand for the tuning control.
3. Keep the regeneration control always just below the point of oscillation; your set is then in the most sensitive condition. This is the reason for using two hands for tuning.
4. If your set then accidentally breaks into oscillation, turn back the regeneration control at once.
5. Do not try to find a station by the "whistle." If your set is tuned just below the "whistling" point, the signals will come in clear and your regeneration control can then be tuned a little further to increase the volume.
6. Do not force regeneration in an attempt to obtain loudspeaker volume from a set not designed for the purpose.
7. Do not force regeneration in an attempt to hear stations beyond the range of your set; be content with those you can really hear.

FISHING IN PRAIRIE WATERS

Increase in the value of the products of the commercial fisheries of two of the three prairie provinces of Canada were recorded during 1924 according to the Dominion bureau of statistics, the grand total reaching \$2,004,162, apportioned as follows: Manitoba \$1,232,563; Saskatchewan, \$482,492; Alberta \$339,107. Compared with the preceding year, the value of Manitoba's fishery product increased by \$211,968 and Saskatchewan's by \$196,849. Alberta showed a decrease of \$99,630.

Whitefish and pickerel were among the principal kinds of fish taken in prairie waters, the former representing 42 per cent of the total value and the latter 28 per cent.

The Maddest One

A passenger took the train at Lyons, entered a sleeper and tipped the guard liberally to put him out of the train at Dijon.

"I'm a very heavy sleeper," he said, "and you must take no notice of my protests. Seize me and put me out on the platform."

He slept. He awoke as the train steamed into Paris. In a raging fury he went to the guard and expressed some emphatic opinions in a varied vocabulary.

"Ah," said the guard calmly, "you have a bit of a temper, but it's nothing compared with the chap I put out of the train at Dijon!"

Advice to motorists: If the new trunk road in this district does not appear wide enough for you, take a few small drinks.

PASSBURG PASSED UP BY NEW HIGHWAY

The grading of the new road between Blairmore and Lundbreck is now about completed and the teams, men and other equipment being used are being moved away for the winter.

The general public cannot but feel pleased at the effort made to give us a passable highway and the grade throughout is such that instead of having difficult hills to climb we can now travel practically from Blairmore to Calgary without having to change from high gear.

About the only objection to the new grade or right-of-way comes from Passburg, which community is practically passed up in order to get what is said to be a better grade along the hillsides by the railway. By this detour somewhat of an injustice has been meted out to people who for a number of years have lived in the registered townsite and had their earnings invested there in real property.

Some of the correspondence that has ensued would perhaps be interesting at this time and in order to enlighten the public on the matter we have gathered the following from these documents:

Under date of October 30th, 1924, Mr. John Kerr brought to the attention of the Hon. Alex. Ross the fact that engineers from his department were surveying for a new road that would isolate the village of Passburg as far as the tourist and the farmer trade was concerned. In this letter he expressed appreciation of what the government was doing towards improving road grades, etc., but also impressed upon him that some consideration should be given the people who have built up the village and been resident on the old highway for so long. It was shown that the public in general would be as well served, the grade just as good and the cost of construction less and maintenance no higher if the old road right-of-way from the west end of the townsite to the bend of the road at or near the section line between Sections 15 and 16-7-3-5, grading along the side hill and connecting up with the new surveyed road were used.

To this letter the Hon. Alex. Ross replied under date of November 3rd, stating that "engineers had spent a considerable amount of time in trying to get the best location for a road through the Crow and any changes that we are making in our main highway route is done after a considerable amount of enquiry and thought. I regret very much that your premises would be somewhat isolated should we change the route as we propose changing it, but it would be much cheaper to move a road than it would be to build a road which is not altogether satisfactory. We have not definitely agreed upon the route in your neighborhood, and before coming to a definite conclusion I will give your letter the attention which I think it properly deserves."

Under date of June 1st, 1925, Mr. Kerr again wrote. He referred to the minister acknowledging receipt of his letter of the 30th October, and his statements that before a final route was selected, some consideration would be given to the plan suggested by him. In this letter Mr. Kerr stated that he was told that morning that the new highway would follow the last line run, which, if true, meant that Passburg was to be isolated. To his knowledge no survey of the route suggested by him had ever been made. Mr. Kerr contended that by making the detour around the place, nobody was being served, but some three hundred yards was being added to the length of the main highway. Sixteen hundred yards of a new road would have to be built, where by using part of the old road some three hundred and seventy-five yards would suffice and just as easy a grade could be had. Mr. Kerr further claimed that "if this new road is built around us, then we as citizens of this country have no rights at all."

Mr. Kerr again wrote on June 13th, drawing attention of the minister to his promise that he would give the suggested route some consideration. Mr. Kerr stated that he had had a

conversation with the engineer, who apparently had received no instructions to survey the route suggested by Mr. Kerr. He frankly explained his position in the matter, how he was governed in locating the route, etc., by grades, and that during the past winter he had paid particular attention to the snowdrifts along the line of his survey. Mr. Kerr claimed that the route suggested by him was feasible, the grade not excessive, the distance shorter by some three hundred yards and that the saving in tires, etc., in the next twenty years would be very considerable. Mr. Kerr offered to undertake to surface the present road through Passburg and connect it up with the new highway and be in a position to prove in a short time whether or not his suggested route could be a success, provided the government would place at his disposal the necessary finances. He asked for the privilege of going over the ground with Commissioner Davidson and for some measure of compensation were it considered inadvisable to divert from the newly-surveyed route.

Mr. Ross acknowledged receipt of Mr. Kerr's letter under date of June 15th, in which he stated that Mr. Davidson would be in the Pass sometime before the end of the month to look it over.

Mr. Kerr again wrote on August 10th, informing the minister that to his knowledge the commissioner had not been over the ground to date. Judging by the progress the contractor was making, work on the detour would start in a few days. Mr. Kerr again stated that "in appealing to him (the minister) last October he was of opinion that he was doing the proper thing, following the correct procedure." He "knew nothing of the work being in the hands of a commissioner until after he had talked with the engineer on the 13th of June." From the beginning, he contended, Mr. Ross had neither verbally or in writing suggested that the final decision was in any other hands than his own. He accepted the written promise of June 15th in good faith and expected a man occupying his position to keep his promise. Mr. Kerr asked that the work on the detour be delayed until an investigation had been made.

The following letter was sent by Mr. Kerr under date of August 13th, 1925:

"The Hon. Alex. Ross,
Minister of Public Works,
Edmonton, Alberta.

"Dear Sir: I presume that by the time this reaches you you will be in possession of Mr. Davidson's report on the diversion the highway is taking here.

"Of course, he approved of Engineer Wallace's route. That was a foregone conclusion, in view of the fact that plans had been prepared and the contract let months ago, and, besides, grading had actually commenced on the detour on the 13th instant, the day before Mr. Davidson arrived to inspect the point in dispute.

"Mr. Wallace denies that there was any speeding up to get started on the detour or that men had been drawn from other parts of the grade to aid in speeding up. It was merely a coincidence.

"I am inclined to differ with him, but in the meantime we will allow it to go at that.

"Mr. Ross, I maintain we have got a raw deal. I was of opinion that citizens had some rights, but now I am forced to the conclusion that we have none at all.

"I have endeavored in former letters to show you what the effect of diverting the travelling public past our store means to us. I have also tried to persuade you that it was not necessary that no one was being benefited, that some three hundred yards was being added to the length of the highway, that the grade would be no easier and the cost probably a great deal more than by taking the route I suggested.

"You, judging from your letter of the 3rd of November, were sympathetic. But what did you do? Was the matter at that time reported to your locating engineers? If so, why

should he have exclaimed during a heated argument with me last Tuesday, 'Why did you not come to me last fall?' and on the 13th day of June, six days after you had promised verbally that the matter would be gone into again, he admitted he had no instructions to survey the route I suggested and that he thought I understood then that the matter was finished.

"To be perfectly candid, I am satisfied that at no time was the route suggested by me ever seriously considered by your engineers. No survey was ever made of it or comparison as to cost and etceteras with the Wallace route made.

"Had this matter been dealt with last spring, as it should have been, and had we been turned down then, we certainly would have brought in an independent engineer at our own expense and had him report on the matter.

"The route suggested by me is practicable and your engineers know it, but evidently they are antagonistic and will not on any account take a route suggested by a man outside their own profession.

"We do not feel disposed to let this matter rest, and while from a legal point of view your engineer's contention that in building roads they need not consider any individual may be correct, still your department is morally under obligation to compensate us innocent victims of a vicious system.

"We would be very much obliged if on receipt of this you would kindly advise us as to whether or not your department would consider compensating us for the monetary loss we are bound to have, whether we continue on our present stand or move."

In acknowledgment of this last communication, Mr. Ross writes:

"This will acknowledge your letter of August 15th, in which you take me to task for my unwillingness to meet your suggestion as to the change of location of our highway near Passburg.

"In the first place, let me assure you that it is not fair to state that I did not review your case upon my return to Edmonton after my interview with you that Sunday morning, and also that it is not necessary to be in the field, to be able to review your case completely, as we have all the details showing the topography of the country, etc., and are quite able to pass judgment on our engineer's recommendations from here."

"I also would remind you that I employ engineers whom I think are competent, and when it comes to locating a road, I depend a great deal on their judgment as to the selection of suitable locations.

"Mr. Davidson has again looked over the ground on his last visit to Bellevue, and he assures me that it would be very unwise to accept your suggestion and route the road past your store. I therefore, regret that I am unable to meet your wishes in this respect.

"With reference to the question of compensation, I am afraid the department does not recognize claims for compensation arising out of change of routes. If we did, we would be constantly called upon to compensate, as we have made a great many changes in our highway system.

"I do not think anyone will claim that if the road in question were badly located in the first place that we should continue that route, and it may be that not only was the department injudicious in their original selection, but probably you also did not use the best judgment in building your store on its present site."

"While we are not in a position to criticize the action of the department of public works in respect to diversion of road from Passburg, we are in sympathy with the people of that community who have vested rights for which they should be entitled protection.

A COSTLY BOWL OF SOUP

Because the soup was too salty, Joseph Smaren, at Chicago, threw the tureen at his wife and was fined \$50 and costs.

DISTRICT AGENTS
ORDERS EXECUTED DAILY

Key is what happens when you knock the L out of Kelly twice.

"Charley's Aunt" will be in town, at the opera house, on December 17.

Donnie Dewar will this season captain the senior hockey team at Drumheller.

A scientist is a man who can discover a fragment of ancient thigh bone and tell how long the animal's jaw was.

Messrs. Patton, of the Patton Coal Company, Harry Rogers and Bolo Burns, were up from Lundbreck on Tuesday.

Al. Smith, of Calgary, has been selected by Mr. Justice Walsh as investigating counsel in the royal commission investigation into the Ewing charges of irregularities in the purchase by the former Liberal government of printing to the amount of \$5,280 from the Eddies Press Limited.

Considerable indignation has been aroused at Hillcrest over the action of some local party or parties being responsible for having several boys appear before the police court at Blaimore, charged with disturbing the peace. (The action arose out of pranks being played on Halloween night and the boys were subjected to penalties totalling \$8 each for doing practically no material harm.

On Monday, November 20th, in the Masonic Hall at Hillcrest, the Ladies' Aid of the Hillcrest United church are giving a hot supper, to be followed by a St. Andrew's night, when the Rev. J. H. Garden, B.A., of Fincher Creek, will deliver a semi-luminous lecture entitled, "A Trip Through Bonnie Scotland." Also Scotch songs and musical items. Supper will be served between 5.30 and 7.30.

Mr. and Mrs. James Bayne, of Richlie, Sask., who have been visiting for a short while with the former's sister, Mrs. E. Madden, of Lundbreck, left on Tuesday's local to visit Mr. Bayne's mother and sister, Mrs. M. Steeves, now resident in Calgary. Gordon Steeves, of the Blaimore Pharmacy, is a nephew of Mr. Bayne. Mr. and Mrs. Bayne are renewing personal relations after an absence of over twenty years.

Justice Boyle has handed down his decision in the case brought by the Groceria Company of Calgary, asking for an injunction to prevent the T. Eaton Company from using the word "Groceria" in connection with their Calgary grocery house. The judge held that the word Groceria is not a trade mark or a trade name, but that the Eaton company had come close to infringing on the name of the Groceria Company by failing to give equal prominence to the Eaton name with that of Groceria.

James W. Jeffery, king's printer for the government of Alberta, and Charles G. Flavin, assistant, have been suspended, pending the royal commission investigation by Mr. Justice Walsh into alleged irregularities in the purchase by the former Liberal government of printing to the amount of \$5,280 from the Eddies Press, Limited. This, the first sensation of the promised investigation, comes in the form of a brief announcement from the provincial treasurer, under whose jurisdiction the king's printer department of the government service is held.

The High River Times remarks: "Once more Chautauqua has come and gone and on this occasion it must be said that never before were the people so completely satisfied with the high quality of entertainment presented, as on this occasion. The lectures were outstanding features of the four days' Chautauqua and in this connection there can be no criticism for the lectures by Dr. Smith and Dr. Hulbert were informative and gave the people much food for thought. We are also glad to state that the contract for 1926 Chautauqua has been altered to a fifty-fifty basis, which places the guarantors of Chautauqua on a basis that will not obligate them to any great extent. This change was necessary as it makes possible the re-appearance of Chautauqua at High River for 1926."

Teacher—"Give us a sentence with the words defeat, defence and defeat?"
Pupil—"De feet went over de fence before de fail."

Uncle—"Well, you young' rascal, how many times have you been whacked at school today?"
Pomny—"Dunno, uncle. I don't take any notice of what goes on behind my back."

AN OUNCE OF PREVENTION

(By Dr. C. M. Hincks, Medical Director, Canadian National Committee for Mental Hygiene)

All over the world a new type of hospital is being built—the psychopathic hospital, where people who have mental troubles are studied and treated.

The very words, psychopathic hospital, indicate the new theories of medical experts—that mental troubles may be studied and successfully treated. A psychopathic hospital is also an aid in prevention. Prevention of the bad mental habits that frequently lead to insanity is part of the field of the science of mental hygiene.

The best time to prevent traits which in later years develop into forms of insanity, is in the very earliest years of childhood. Good habits of thinking are as easily formed as bad ones. Discipline, self control, courage, affection and loyalty, the strength of character and the qualities of personality that make for contentment and a happy useful life can be developed in children by curbing the bad and encouraging the good by personal example and precept. As in everything else, an ounce of prevention is worth a pound of cure.

OPENING OF RED SEA SHOWN IN "THE TEN COMMANDMENTS"

Will Rogers, in speaking of his inauguration as president, in case the people of the United States had chosen him instead of Calvin Coolidge, said:

"In my movie contingent I would have had Cecil De Mille (of 'The Ten Commandments' fame) part the waters of the Potomac and let the people west of the river come over. If he divided the Red Sea, it ought to be a cinch to handle the Potomac, (it's more a name than a river, anyway)."

Mr. Rogers, like so many others, has been impressed by the marvelous feat of photography in this picture, the parting of the waters to allow the Israelites to pass through. The waters of the sea actually divide. A path is opened. On the side huge walls of water glisten. The children of Israel walk through and Pharaoh's chariots follow. They are about to reach safety when the waters close. Men and animals are tossed around and drowned in the angry sea. It is one of those scenes which is breath-taking.

"The Ten Commandments" will be shown at the Orpheum Theatre, Blaimore, on Friday and Saturday, with matinee Saturday afternoon.

A CLUB WOMAN'S CREED

The following creed has been adopted by the Bow Valley Women's Institute, the annual session of which was held in Brooks on Friday, October 9th:

"Keep us, O God, from pettiness; let us be large in thought, in order, in deed. Let us be done with fault-finding and leave on self-seeking. May we put away pretence and meet each other face to face without self-pity and without prejudice. May we never be hasty in judgment and always generous. Let us take time for all things; make us to grow calm, serene, gentle. Teach us to put into action our better impulses, straight-forward and unafraid. Grant that we may realize it is the little things that create differences; that in the big things of life we are one. And may we strive to touch and to know the great common woman's heart of us all, and O Lord, let us not forget to be kind."

If some men go as they pay it will take them a long time to get there.

"Please, uncle, will you make a noise like a frog?"

"What a funny question. Why do you want me to do that?"

"Because," said Bobbie, "when I ask father to buy me anything he always says, 'Wait till your uncle croaks!'"

HILLCREST MATTEENINGS

Alf. Taylor, has been engaged as ice-maker at the rink for the season.

Mrs. Frank J. Smith returned on Saturday, after an extended visit to Calgary.

The Old Timers were shocked to hear of the sudden death of Mr. Daniel May at Vancouver.

A radio has been installed in the community Club, which was formerly the old Anglican church.

Joe Royle and Billy Atkinson are at present engaged on the "E.P." ranch, owned by the Prince of Wales, at High River.

J. W. Making, F. J. Smith, C. Smith and Ed. Royle attended the district First Aid meeting held at Coleman on Sunday afternoon.

Hillcrest now possesses a fine road into the City, now that the junction with the main highway at the slide has been improved. The next thing we need is a road direct from Hillcrest to Passburg, along the south side of the river.

The Mothers' and Daughters' Sunday was observed at the United church on Sunday last, the service being addressed by Miss Heatherton. At the evening service the church was filled to capacity. After the service a light supper was enjoyed by all the young ladies at the residence of the pastor, Rev. C. H. Pinder.

The following programme was rendered at the recital given in the opera house on the night of Wednesday, November 18th, by the pupils of Madame Jones:

Piano Solo—"Moonlight Revels," by Jean Cruickshank.

Piano—"Japanese Dance," by Helen Westrup.

Vocal Solo—"What a wonderful world it would be," by Bessie Atkinson.

Piano Solo—"Beethoven's Variations in F" by Norman Miller.

Piano Solo—"Merry Peasants," by Isabel Westrup.

Piano Solo—"Musette," by Margaret Stevenson.

Piano Solo—"Fate Champness," by Mrs. Rose.

Piano Solo—"First Sorrow," by Helen Rose.

Vocal Solo—"Little Coon's Prayer," by Mr. P. Salt.

Piano Solo—"Shepherd's Boy," by Peggy Richards.

Piano Solo—"Curious Story," by Bob Cruickshank.

Piano Solo—"Dance of the Rosebuds," by Celestina Casagrande.

Vocal Solo—"A Sleep Song," by Jennie Stobbs.

Piano Solo—"Pierrette," by Miss Horton.

Piano Solo—"Morning Prayer," by Mary Warriner.

Piano Solo—"The Little Chinaman," by John Makin.

Vocal Solo—"Sleepy Hollow Time," by Miss Lillian Wilcox.

Piano Solo—"Minuet in G," by Gwyn Richards.

Piano Solo—"Mazurka by Chopin," by Olive Howcroft.

Piano Solo—"Tarentelle," by Nellie Royle.

God Save The King.

All the various parts were exceptionally well performed.

THE SENTIMENTAL ENGLISH

Sinclair Lewis in the American Mercury: The theory of Cook trippers and of English pro-consul is that the French are hysterical little people, cloyer but unsound, given to gesticulations, "silly food, and the practice of weeping on all occasions, whereas Englishmen are hard, practical, beefy fellows, who would rather die than be caught expressing emotion. But French poetry and fiction, the real expression of the national soul, are, except for Victor Hugo and a few females and one or two novelists, popular among the wives of respectable tradesmen, as heartless and practical and delf as a diamond glass-cutter, while English literature, especially the greatest, is dripping with sentiment and Utopianism.

A War Of Extermination

Despite the fact that the statement of the great European nations, and the League of Nations, are earnestly striving to bring about understandings and conditions which will have the effect of preventing future wars, nevertheless the war in progress of this and that invention and the effect it will have on the "next war."

The "next war" is, as a matter of fact, now being waged. It has been in progress for some time and is increasing in intensity. But instead of being a war between man and man, it is a war of extermination between man and insects. Man has won victories in certain sectors of the battle line which extends around the world, although, in the language of the late Great War, he has not yet been successful in fully consolidating his position, thus making his victory secure and lasting. In other sectors, the insects still have the upper hand and seem to be gaining.

The battle between man and the insects is not spectacular but it is a strenuous and extremely costly one fraught with grave possibilities if there is any slackening in man's onslaught until final and complete victory is obtained.

In the Canadian House of Commons last session, Hon. W. R. Motherwell, minister of agriculture, made a brief statement regarding the offensive being waged under the direction of that department against crop destroying insects in Canada. When he was asking for an increased appropriation for this work, notwithstanding the general policy of reducing rather than increasing expenditure and extending the scope of public services.

Addressing the Rotary Club of Ottawa a few days ago, Dr. Arthur Gibson, chief of the entomological branch of the Department of Agriculture, stated that from 10 to 25 per cent. of every crop grown is destroyed by insects, while millions of dollars worth of pulpwood is destroyed from the same cause. It is estimated that the boll weevil causes damage to the cotton crop of the United States to the extent of \$200,000,000 each and every year, and it has been proposed that this beetle may in time ruin the cotton growing industry of that country.

The boll, or scabber, which affects cattle, causes a loss in Great Britain alone of \$1,000,000 to \$2,000,000 annually.

Here in the West we know by bitter experience what the sawfly and other insect's do to the grain crops, and how many a promising field has been ruined by them.

But it is not in relation to crops and cattle alone that insects are waging war on mankind. Until comparatively recent years, one-half the human death rate of the world each year was due to malaria, transmitted from person to person by the mosquito. For many, that a score of years the mosquito held up the construction of the Panama Canal. Between 1881 and 1889 twenty-two thousand laborers on canal construction died of malaria or yellow fever, and the failure of successive canal companies was due to the mosquito, and it was not until the United States engineers studied and fought the mosquito that the canal was finally constructed.

The Rockefeller Foundation has provided millions of dollars for a campaign against the hookworm.

But if this war against the insects is to succeed it must not be left solely to Governments, scientific bodies and interested experts. As in the Great War, the whole nation, and womanhood of the nations must be mobilized for victory.

The common house fly is a much more dangerous enemy of man than even yet, notwithstanding all the educational work that has been done, that average person realizes. If typhoid, diphtheria and other diseases are to be wiped out, the filth and disease carrying house fly must be first exterminated, and "swatting the fly" should not be regarded merely as a passing fad, or an amusing diversion, but as a really serious business in every Canadian home.

Government experts have compiled much valuable information against insects—those which should be fought and destroyed and those which are allies to man. It remains for the individual citizen to apply that knowledge and co-operate with the Government departments of health and agriculture in waging the battle, upon the successful outcome of which depends human lives and countless millions of dollars annually.

100-Story Buildings

The American city of 2000 A.D. will have buildings 100 or more stories in height, with landing stages for air craft, and the streets will be two or three levels to relieve traffic congestion. This is the conception of the future metropolis, a masterpiece sketched by artists and architects who will exhibit their pictorial prophecies as one of the features of the American Institute of Steel Construction.

Dedicate Book of Remembrance

The seventh anniversary of the ending of the Great War was commemorated in Halifax by a service of special impressiveness in the Cathedral of All Saints, marked by the dedication of the Book of Remembrance, a beautiful specimen of skilled workmanship containing the names, so far as they were procurable, of all the men and women of the province of Nova Scotia who fell in the Great War.

Wrap up warm inside

On a raw winter's day you wouldn't venture out without a good overcoat to keep out the cold. But your inside wants keeping warm as well.

Make a practice of drinking BOVRIL regularly during the winter months. It keeps up your vitality and helps you to resist colds, chills and influenza.

Hot BOVRIL Puts Beef Into you

Homestead Entries

File On 29 Homesteads in Four Western Provinces in Western Canada

Homestead entries in the four western provinces during the month of September numbered 29, a decrease as compared with the same month last year, according to a report issued by the Dominion Lands Branch. During September last two homesteads were filed on in Manitoba; ten in Saskatchewan, fifteen in Alberta and two in British Columbia.

Agony Of Lumbago Quickly Soothed Away By "Nervine"

For the sharp, piercing pain of Lumbago, and the torturing aches of Rheumatism, no medicine is so efficient, so quick to bring comfort and relief as good old "Nervine." This wonderful balsam penetrates through the tissues very quickly, strikes at once to the core of the pain, draws the blood from the congested area, and thereby relieves the pain in a short time. Those who suffer from stiff joints, swellings and Rheumatic conditions should use Nervine. The King of Old Nervine today, 35c. at all dealers.

Eliminating Responsibility. The Indians of the Canadian tribe of Brazil kill their aged members when they have become so feeble that they can no longer migrate from place to place. These old people are tossed upon the head with a heavy war club, and they submit cheerfully to this fate.

BABY'S OWN TABLETS ARE OF GREAT VALUE

To All Mothers Having Young Children in the Home.

No other medicine is of such aid to mothers of young children as Baby's Own Tablets. The Tablets are the very best medicine a mother can give her little ones during the dreaded teething time because they regulate the stomach and bowels and thus drive out constipation and indigestion, prevent colic and diarrhoea and break up colds and simple fevers.

Concerning Baby's Own Tablets, Mrs. John A. Patterson, Scotch Village, N.S., says: "I have five children, and all the medicines they ever got in Baby's Own Tablets. I would use nothing else for them and can't say enough for the Tablets to all other mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Plan To Reduce Crime

Offer \$2,500 Reward For Best Programme to Reduce Crime in New York

An award of \$2,500 is offered by the Society for the Prevention of Crime to the citizen or public official who presents, before January 11, the best programme to bring about the reduction of crime in New York City.

The announcement of the award states that while a single suggestion may win, the problem is so complex it seemed best to open the way for a programme or series of related efforts toward the solution. The contest is open to every citizen and public official in the United States.

The total number of words submitted must not exceed 2,000, which may include not only an exposition of the plan but argument for it. A brief summary, however, may accompany the manuscript, which may be typewritten. No manuscript will be acknowledged or returned.

Debt Funding Problems

France Hopes to Obtain Better Debt Terms From U. S.

Hopes that France may obtain far better terms than the United States debt funding commission was willing to give M. Chailaux have been raised by the Italian debt settlement. The terms are regarded in official French circles as sharply contrasting with the demands made upon France.

It looks, however, as though nothing can be done before next year, to reopen negotiations with the United States, and that winter is then when will depend upon the outcome of the financial crisis.

Seed Extraction Plant

The Dominion Government seed extraction plant at Westmount, B.C., is expected to start operations soon. A consignment of 100 sacks of Sitka spruce cones from the Prince Rupert district is practically assured for the British forestry commission, London. Only 10 sacks of Douglas fir cones will be picked in the Fraser Valley to fill the Old Country order.

John Shields, Maryland's champion wrestler, has made a victim from Minneapolis's Liniment handy.

British Columbia Paper Mills

Now Selling Product On An Ever Widening Market

British Columbia paper is now selling on a widening market. It supplies Western Canada and a large part of the Western Pacific coast states; 1,000 tons monthly goes to Buenos Aires, several orders were recently sent to France, which it is expected will become a steady market. A market has now been opened at Antwerp. As a result of the new Canada-Australian trade treaty, paper manufacturers are looking for a big demand from that market, which had been hitherto restricted due to a high import duty demand.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

To Relieve Farm Drudgery

Modern Methods May Soon Be Applied To Make Work Easier in the Farm Home

The Minneapolis Journal remarks that men who only a few years ago predicted the coming of a time when wire-borne current, long used in cities, would take much of the drudgery out of farm chores were looked upon as impractical dreamers. But so were the men who first saw the possibilities of radio. So were Edison, Bell, Morse, Stephenson and Fulton dreamers in their day. The steamboat dream came true. So did the railway dream, the telegraph dream, the telephone dream, the electric light dream, the automobile dream, the motion picture dream, the radio dream. And so the drudgeless farm dream may come true.

Her Heart Palpitated She Had Fainting Spells

Mrs. J. Wilson, Port George, N.B., writes: "I suffered from palpitation of the heart and fainting spells, and at times, I could not be left alone. I was so nervous."

My trouble was caused from overwork and worry, having been jobless with a large family. I had tried everything, without any relief, but I know, today, that I would have been a nervous wreck but for your wonderful

These Pills are for sale at all drug stores and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Time after all it is but an elevation on which the victim is placed in order to give the public a better chance to throw mud at him.

Insanity may be more prevalent but you don't notice it except on the highway.

SUNDAY SCHOOL LESSON

NOVEMBER 20
PAUL BEFORE AGRIPPA

Golden Text: I was not disobedient unto the heavenly vision.—Acts 26:19.
Lesson: Acts 26:1 to 26:23.
Devotional Reading: Psalm 43:1-5.

The Text Explained and Illumined

Paul's Defense Before Agrippa, verses 132.—King Agrippa was Herod Agrippa II, ruler of small principalities in Northern Palestine, with the title of king; son of Herod Agrippa I, who died 40 A.D. The son of Zebabai, who beheaded John the Baptist; great grandson of Herod the Great, who measured the innocents in his attempts to kill the infant Jesus. Paul began his defense not only for himself but of his gospel by graciously referring to Agrippa's knowledge of Jewish questions and customs, and then he told of his own life as a Pharisee, his persecution of Christians, his conversion, and his commission to preach to the Gentiles. To the heavenly vision granted him on the way to Damascus he had been obedient. "Whereupon I saw the vision," or "Whereupon I was enlightened of the vision," or "Whereupon I understood the vision." Right up to the present, the story of his life, they are all very well, but the right result in "Whereupon I was not disobedient unto the vision." Right up to the present, the story of his life, they are all very well, but the right result in "Whereupon I was not disobedient unto the vision." Right up to the present, the story of his life, they are all very well, but the right result in "Whereupon I was not disobedient unto the vision."

It is not enough that a man should say, "Whereupon I saw the vision," or "Whereupon I was enlightened of the vision," or "Whereupon I understood the vision." Right up to the present, the story of his life, they are all very well, but the right result in "Whereupon I was not disobedient unto the vision." Right up to the present, the story of his life, they are all very well, but the right result in "Whereupon I was not disobedient unto the vision."

The Russian Front

Bolshevik Activity Against the British Empire Has Been Redoubled

It is a singular coincidence that the place where Russian and British business clash are the same as those which were the scenes of Anglo-Russian rivalry in the unhappy year before the agreement of 1907. Tormenting spoliation is out of date; but competition for hegemony has taken the place of arms in the struggle for power. Having received a serious rebuff in this election, the last general election, Bolshevik activity against the British Empire has been redoubled. And in this and the schemes of Moscow, believe that they have found the Achilles heel of Great Britain.—London Times.

As a veritable excellent program in the Mother's Union, Women's Extension, I have saved the lives of countless children.

Manufacture Of Sugar

Amount Produced In Canada Continues To Increase

The amount of sugar manufactured in Canada, by month continues favorably in excess of the amount manufactured in 1924. For the four-week period ending October 10, 97, 913,214 pounds were manufactured, as against 96,749,848 pounds in 1924. For the year to date, 817,470,816 pounds were manufactured, as compared with 655,632,418 pounds in the previous corresponding period.

Exports of refined sugar from Canada during the month of September show a considerable increase as compared with the same month last year. According to a report of the bureau of statistics, shipments during September last amounted to 35,440,000 pounds, as compared with only 33,500,000 pounds of September, 1924. The value also shows a corresponding increase, being \$1,338,339 in September, 1925, as compared with \$60,316 in the same month a year ago.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The direction is to rub, and when used as a dressing to apply. The direction is to rub, and when used as a dressing to apply.

APPEAL IS MADE BY CARRIE FOR NATIONAL UNITY

Hamilton, Ont.—A stirring appeal for national unity as a lasting memorial to the sons of Canada, who paid the price of victory with their lives, was made by Sir Arthur Carr, who officiated at the dedication of the memorial school to the memory of 1,300 Hamilton men who died in the Great War.

Canadians of today had a solemn obligation resting upon them, said Sir Arthur, "to treasure and conserve the things handed down to us by our fathers." Because of the record of her sons, Canada had reached a place in the world which a short time ago was considered impossible of attainment. With pride, Sir Arthur said that a Canadian had been chosen as head of the League of Nations.

"Comradeship and unselfishness were qualities of the Canadian soldiers," he declared, "and there arose a unity of purpose among them never before known. Why should they have been? In Canada, they were not only united in purpose, but they were united in spirit. Why should we need to plead for courage in times of peace when it was not necessary to do so in war? It is not Alberta or Nova Scotia, Quebec or Ontario, but Canada. That is the spirit we want. It is the spirit which is worthy of the men whose memory we commemorate to-day."

Resents Action Of Pacific Cable Board

Report Says Postmaster-General Takes Exception to Methods Adopted

Respecting New Cable London.—The Daily Express says it understands that the postmaster-general of Canada, Hon. Charles Murphy, has recommended the Dominion Government should withdraw from partnership in the Pacific cable board.

The withdrawal, the Express says, is on the ground that among other things, that duplication of the cable from Vancouver to San Francisco, decided upon in the absence of Canadian representatives and the contracts were therefore awarded despite Canada's protests and in defiance of the provisions of the Imperial Cable Act, under which, unanimity in such matters is essential.

Ottawa.—In the absence from the city of Hon. Charles Murphy, representative information in regard to his representations on the duplicate Pacific cable are not available. Although it is said the government has not yet taken any definite step, looking to the withdrawal of Canada from participation. It is understood, however, that Mr. Murphy has taken strong objection to methods adopted by the board in respect to the new cable.

Canada's Total Trade Shows Big Increase

For Seven Months Ending October Increased Was \$197,000,000

Ottawa.—Canada's total trade increased \$197,000,000 during the seven months ended October, according to figures issued by the department of customs and excise. The increase is in comparison with the figures for the corresponding seven months of the previous fiscal year.

As between export and import trade, it is made up as follows:

Increase in export trade \$123,000,000; increase in import trade, \$74,000,000. Total trade increase \$197,000,000.

Over the seven months period the increase in exports of farm products, dressed as mainly food, was fifty-two millions; in farm products other than food, thirteen millions; in coal, oil and mineral products, twenty-seven millions. Exports of raw wool, wood products and paper increased sixteen millions.

Says Hydrogen Will Run Motor

Toronto.—Professor J. C. McLaughlin, head of the physics department at the University of Toronto, famous for his discoveries and researches with helium, predicts that there will be some day a new type of motor which would receive its power from hydrogen and the driver will carry extra tanks in his vest pocket.

Agreement Reached

Peking.—The customs conference announced that its sub-committee appointed to elaborate a treaty regarding the restoration of tariff autonomy to China has arrived at a complete agreement. The formula was submitted to a full meeting of the delegates on November 19.

Saskatchewan Corn Show

G. H. Hoffman, Maple Creek, Carries Off Sweepstakes

G. H. Hoffman, Saskatchewan's corn king at the first corn show held in Maple Creek, was again awarded first place at the third provincial corn show held at Indian Head.

Maple Creek made a clean sweep of the special prizes, for in addition to the sweepstakes, Mr. Hoffman won the silver trophy cup offered by the Ogilvie Flour Milling Company for the best exhibit of ten ears of any variety of white or yellow Dent, winning this competition with Minnesota No. 12.

A. J. Colquhoun, of Maple Creek, won the shield offered by the Regina board of trade for the best ten ears of any variety of Blue Dent corn, and also the silver cup donated by the Saskatchewan Wholesale Implement Association for permanent competition amongst Saskatchewan exhibitors showing corn for the first time.

The silver cup offered by the Saskatchewan Creamery Company for the best ten ears exhibited by a girl in the junior section.

A. S. Unsworth, of Plaford, won the first prize for the best sheaf of soft wheat, while the best sheaf of hard wheat was considered by the judges to be one of the finest exhibits of the whole show as there was a great bulk of green frozen ears that would all have been prize ears peeping out of the foliage.

Three other prizes for the same event were awarded to D. Hoffman, G. H. Hoffman and E. G. Hoffman, Maple Creek.

Saskatchewan's fourth provincial corn show will be held at Estevan. The invitation, presented by T. A. Torgeron, president of the Estevan Agricultural Society, and managing director of the Prairie Nurseries, was accepted.

August Peterson, Westburn, was elected as president of the association, with T. A. Torgeron, Estevan, as vice-president. The full board of officers follows:

Patrons: Hon. W. R. Motherwell, Hon. C. Dunning, Hon. C. Hamilton, Dr. James McKay, President; T. Torgeron, Estevan; second vice-president, T. Colquhoun, Maple Creek; secretary-treasurer, Colgate Moore, Estevan; executive, A. G. Garth, Estevan; W. Clapham, Estevan; J. A. Swanson, Estevan; Bert Irwin, Estevan; G. D. Mathew, Indian Head; director, R. P. Robinson, Shaunavon; Geo. Spence, Metchosin; F. Burton, Vanguard; J. G. Taggart, Swift Current; J. B. Andrews, Regina; Prof. L. E. Kirk, Saskatoon; Prof. J. G. Rayner, Saskatoon; M. P. Tullis, Regina; P. A. Forsyth, Prince Albert; Paul Halley, Wakarusa; Tom Rowles, Empress; Bert Geo. Westburn, Norman; H. A. Hendry, Estevan; R. M. McCall, Swift Current; W. J. Warren, Bellevue; H. Hoffman, Maple Creek; C. Marks, Midsay; W. H. Gibson, Indian Head; Percy E. Reed, Regina.

Has Faith In Canada

Sir Henry Thornton Entertained at Dinner in British House of Commons

London.—Belief that Canada was on the threshold of great prosperity, was expressed here by Sir Henry Thornton, president of the Canadian National Railways, who was entertained at dinner in the House of Commons by Mr. Lloyd George.

Sir Henry spoke of the opportunities awaiting the investment of British capital in Canada, and emphasized the importance of obtaining British capital in the Dominion rather than capital from foreign sources.

Among the guests were Premier Baldwin, former Premier Ramsay MacDonald and Right Hon. Winston Churchill.

Approve Peace Pact

British House of Commons Ratifies Security Agreement

London.—The spirit of Locarno pervaded the crowded House of Commons when ratification of the European (Locarno) security pact—the Treaty of Mutual Guarantee—was voted 376 to 20. A League amendment was defeated previously, 322 to 130.

When the speaker put the motion for approval, presented by Austen Chamberlain, secretary for foreign affairs, there was an almost unanimous shout in his favor. But back bench Labor members persisted in calling for a division. The majority of the Laborites voted with the government, but about a score abstained from voting.

To Negotiate Treaties

London.—The Daily Mail says the Irish Free State is about to negotiate economic treaties with France and Germany. Both France and Germany believe they will find a market in Ireland.

Canadian Exhibit Is Success

Glowing Accounts Received at Ottawa From New Zealand

Ottawa.—Dispatches from Dunedin, N.Z., to the department of immigration here, contain glowing accounts of the success of the Canadian exhibit at the Dunedin exhibition which was opened Nov. 17. The dispatch, from D. H. Ross, Canadian trade commissioner in Australia, who is in charge of the Dunedin exhibit, declares the Canadian section as follows:

"The exhibition covers 16 acres, and is one-third the size of Wembley. The Canadian court is 27,000 square feet in area and is in the most prominent position of the grounds."

"The magnificent golden entrance gates to the court are inscribed with a 'Welcome.' At the end of the main corridor is a striking diorama composed of a huge waterfall, pouring over 1,000 gallons of water a minute in a setting of natural rocks, trees and shrubs with a background depicting actual scenery of the Canadian Rockies."

"The lighting system changes at intervals from broad daylight to moonlight, providing a spectacle that has not been seen at any previous Canadian exhibition. Canadian emblems, including maple leaves, beavers, animals, and the coat of arms of the Dominion, are used extensively."

ASK IMMEDIATE COMPLETION OF THE H. B. ROAD

Winipeg.—Arguments of Western Canada in pressing for completion of the Hudson's Bay Railway were advanced before the conference by F. R. McMillan, Saskatoon; Brig-Gen. R. W. Paterson, Winipeg, president of the Ontario-Hudson Bay Association; Prof. R. C. Wallace, of the Manitoba University; and E. H. Martin, Winipeg.

Armed with reports of competent engineers and other authorities, the speakers called upon the assembly to give its support to the "just demand of the prairies." Millions of dollars of the people's money, Mr. McMillan asserted, had been expended on the road which exhaustive investigation had proved to be feasible in addition to affording a needed outlet to the sea for the central portions of the Dominion.

Those who were agitating for the completion of the road were not asking for the expenditure of forty or fifty million dollars, Brig-Gen. Paterson said. "All we ask is the fulfillment of pledges made by successive federal governments and the same chance that has been given to Montreal and other Canadian ports, upon which many millions have been spent in development. We are only asking for reasonable treatment. There is no attempt being made to divert traffic from the railways at present serving the country, but export trade is being through the United States is wanted. General Paterson warned against dangers of further procrastination, stating that rehabilitation of the road would involve double the outlay if it were abandoned to the elements."

General Paterson estimated it would require approximately six million dollars to complete the road to Port Nelson and provide the necessary harbor and channel facilities. Mr. Wallace referred to the potentialities of the north country, declaring the completion of the line would contribute to the extension of the country north, south and west together east and west.

Towers Found Guilty

Winchester, Eng.—Thomas Towers, first officer of the Canadian Pacific liner Melita, was found guilty at the Winchester assizes of the murder of Captain A. H. Clews, commander of the Melita, on board the ship at Antwerp on October 21, but was declared insane.

Towers will be detained "during the King's pleasure," presumably in an insane asylum.

Win Post-Graduate Scholarships

Winners of the ten \$500-W. C. MacDonald Inc. post-graduate scholarships in Scientific Agriculture at Macdonald College, St. Anne de Bellevue, Front row, left to right: Lloyd Duffell, Quebec; J. M. MacLean, Quebec; Charles F. Forrester, British Columbia; Cyril Kay John, Alberta; Altkinson, New Brunswick. Back row, left to right: F. E. Dyer, Ontario; Kenneth B. Stewart, Saskatchewan; John A. Clark, Prince Edward Island; Kenneth A. Harrison, Nova Scotia; William Pope, Manitoba.

RACIAL REVOLT SWEEPS THROUGH ISLAMIC WORLD

Paris.—The rebellion against the French administration in Syria is not simply an internal quarrel, but the symptom of a vast religious and racial revolt that is sweeping through the Islamic world. This was the warning which General Sarraji recently recalled as French high commissioners in Syria, voiced before members of the joint army and foreign relations committee of the Chamber of Deputies.

But, he added, the flame had been fanned by the attitude of his predecessors toward the family of Sultan Al-Ahshah, who, fired with the ambition to be a second Abd-el-Krim, is leading the Druses with their adherents—Bedouins and certain trans-Jordanian elements—against the French.

The French forces, now amounting to 20,000 effectives in Syria, he continued, were insufficient, and he laid stress on the need of reinforcements.

Says Canada Needs National Sentiment

People Must Solve Many Problems Opinion of Winnipeg Man

Winipeg.—The moulding of a national sentiment towards the development of the Dominion creation of a spirit of imperial unity, national economy and aggressive assault upon the fundamental problems facing Canada today were urged by leaders in the Industrial life of the Dominion, at a session of the national economic conference here.

Tracy Sweetman, K.C., former president of the Winipeg board of trade, declared Canada's destiny depended upon the measure of eagerness and determination with which the people of the Dominion applied themselves to the tasks which, when solved, would take the country out of its present difficulties and elevate it to a position among the virile, prosperous nations of the world.

Predicts Greater Immigration Next Year

C.P.R. President Says New Arrangement With Railways Will Help

Winipeg.—"I confidently expect a revival in railway immigration to Canada in 1925 due to steady publicity and the facilitating of admissions arising out of the new arrangements between the Canadian government and the railways," said E. W. Beatty, president of the Canadian Pacific Railway, who arrived here to address the delegates attending the economic conference.

"There is no general tendency in Great Britain to decry Canada," said Mr. Beatty, "but we have not been as insistent as we should be in pressing the advantages of this country or until recently to offset the adverse propaganda there, most of which has had nothing whatever to do with Canada as a desirable place to live in."

Towers Found Guilty

Winchester, Eng.—Thomas Towers, first officer of the Canadian Pacific liner Melita, was found guilty at the Winchester assizes of the murder of Captain A. H. Clews, commander of the Melita, on board the ship at Antwerp on October 21, but was declared insane.

Towers will be detained "during the King's pleasure," presumably in an insane asylum.

For Calendar Reform

League of Nations Would Establish Fixed Day For Easter

Geneva.—An appeal for help in re-forming the calendar has been dispatched throughout the world by the League of Nations, which especially craves assistance in the delicate task of establishing a fixed date for Easter. Calendar reform has been entrusted by the league to a special committee, which includes ecclesiastical authorities of large religious movements and also a United States member, Willis H. Booth, former president of the International Chamber of Commerce.

Secretary-General Drummond, in a letter sent to all members of the league, explains that the need of definitely fixing a date for the Easter festival is felt in economic and educational circles. All governments are requested to forward views of their educational departments in the matter.

Juvenile Champions Attend Winter Fair

Six From Prairie Provinces Enjoy Royal Show at Toronto

Toronto.—After literally enjoying the bacon by producing the highest grade hogs in their respective localities, six juvenile champion avine breeders went to the Royal Winter Fair at Toronto as guests of the Canadian Pacific Railway. To Vern Johnson and Oscar Gudgison, who are from the Peace River district, 15 miles from the end of steel, and 2,500 from Toronto, and Alvin Johnson, a journey in their lives, Miss Mamie McCormack and Miss Grace Ewen, of Kenton, Man., are the champion breeders of Manitoba, while Lorne Jory and Fred Argue, the Saskatchewan champions, are from Rouleau, Sask.

New Garnet Wheat

Hon. W. R. Motherwell Attaches Much Significance to Discovery

Toronto.—Hon. W. R. Motherwell, Dominion minister of agriculture, who attended the Royal Winter Fair here, attaches much significance to the discovery of the new early-ripening Garnet wheat, which, he said, was just as profitable as any variety. The new wheat, he said, growing in the west will result in a yield of garnet wheat, according to Hon. W. A. Tamm, minister of agriculture for Saskatchewan, who is in Toronto en route for Ottawa.

Saskatchewan Legislature

Announced That Assembly Will Meet On December 3rd

Regina.—The Legislative Assembly of Saskatchewan will convene Thursday, December 3, Hon. Chas. A. Dunning, prime minister of Saskatchewan, has announced.

When the newly-elected house meets at 3 o'clock that afternoon, Lieutenant-Governor Newlands will open the first session of the sixth legislature of the province. Twenty-one new men will take their seats in the Provincial Legislature for the first time.

HOW FARMERS HAVE BENEFITED BY WHEAT POOL

Chicago.—Wheat farmers in the United States this year will profit to the extent of between 60 and 75 million dollars as a result of indirect benefits derived from the way the Canadian Co-operative Wheat Producers' Limited has handled the Canadian wheat crop.

This startling commentary and outstanding praise for the Western Canadian Wheat Pool came from the lips of Theodore E. Hammett, secretary of the federal department of commerce, who has just returned from an extensive study of the pool marketing methods. Hammett was sent to Western Canada by Herbert Hoover, secretary of commerce, to study the new method of marketing grain and to be enthusiastic in his praise.

As the personal representative of Hoover, Hammett explored the wheat pool from every angle. He canvassed the record for effectiveness, as well as possibilities for the future, and he found no flaw either in the principle or its application. Hammett gives unreserved credit to the wheat pool for keeping up the price of world wheat, and it is in this connection that he has his belief that American farmers have benefited enormously by feeding the wheat slowly to the market, instead of throwing the farmers' surplus into the market all at once.

Hammett's report was a most valuable contribution to the world demand without creating a surplus. The wheat pool has been a success in the past, and it is a success in the future. The wheat pool has been a success in the past, and it is a success in the future.

West Leads in Heavy Horses

Toronto.—Western Canada was demonstrated supreme in heavy horses in the classes judged at the Royal Winter Fair. The champion heavy horse was a yearling named "Big Boy" and the prize was a heavy breeder showing the great material of prices for Clydesdales.

GRAND TRUNK IS CAUSE OF DEFICIT ON GOVT. ROADS

Ottawa.—Comments on the controversy between the Canadian Government and certain of the Grand Trunk shareholders is contained in the annual report of the department of railways and canals, just issued. In this respect the deputy minister, Major G. A. Bell, reviews the history of the five years since the G.T.P. was taken over by the government, and states that during that period \$24,768,781 had to be provided for investment account of the whole Canadian National system, including new construction, betterments, property acquisitions and new equipment, and that in all \$472,835,935 was added to the debt of the roads comprising the Canadian National Railways.

"The view of the remarkable attitude of a section of the British press," continues the deputy minister, "is worthy of note that during that period the Grand Trunk has required loans and advances from the government amounting to \$165,000,000 as well as \$15,000,000 on Grand Trunk Pacific account. And in addition to the guarantee in perpetuity of the interest on certain debenture stocks as set out in the acquitting agreement—stock at par value of \$13,207,141 with interest requirements, totalling \$4,588,633 annually—the government has also guaranteed on Grand Trunk account—since acquisition two bond issues of \$25,000,000 each, and floated an equity issue of \$15,000,000.

The report goes on to point out that since the re-organization out of bond issues floated by the Canadian National Railways, no less than \$24,899,167 was advanced to the Grand Trunk in addition to the aid referred to in the preceding paragraph.

May Boycott Mussolini

Report in London That This Is Intention of Labor Members

London.—If Benito Mussolini, the Fascist Premier of Italy, comes to England on December 1 to sign the Locarno pact, it is possible he may be boycotted by motor transport at which he lands in London. It is thought that in view of the report that the Labor leaders and Labor members of parliament intend to boycott Mussolini, no locomotive engineer will agree to drive a train on which he is to travel.

This is the talk among the trades unionists. Although the Locomotive Engineers' Union has taken no action, John Bromley, its secretary, says a refusal by the trainmen to bring Mussolini to the capital would not surprise him.

The Daily Express says that the problem of safeguarding Mussolini in London is exercising the Scotland Yard authorities. The newspaper adds that other distinguished visitors will be accommodated at hotels, but that it is possible the Italian premier, although the British Government's guest, may stay at the Italian embassy.

Urges Higher Place For Agriculture

Should Have Better Standing in Universities Says Dean Howes

Toronto.—A plea by Dean Howes, of the College of Agriculture, University of Toronto, for a more important place for agriculture in higher education, featured the addresses at the joint dinner of the Ontario Agricultural College alumni and the Canadian Society of Technical Agriculture here.

While speaking, he did not wish to draw any comparisons, Dean Howes pointed out that the College of Agriculture was a part of the faculty of the University of Alberta and the students had not only proven themselves capable of making a most successful footing with those of other faculties, but on three different occasions, one of their number had been elected as president of the student body of the university.

Papal Is Acquitted

Toronto.—Andrew Papal was acquitted by a jury under Mr. Justice Wright in the assault here on charges of theft and bribery in connection with the Ontario Government bond transactions. The jury reached their verdict after four days and twenty minutes of deliberation, and found Papal "not guilty" on all charges preferred against him.
